**Guidelines for Paid Promoted Content**

1. Paid Promoted content must be submitted to the Ad Manager for approval prior to publication. Advance scheduling is necessary, as space is limited. BNG may reject content which is inconsistent with its mission or does not provide timely and useful information for our readers. If editing is necessary, advertiser will be notified.
2. Content should be a minimum of 200 words. The ideal length is 500 to 600 words, but there is no limit.
3. Content should include no more than three links. Links must be applicable to the article and will open in a new window.
4. Each article can include multiple images—a large image at the top of the landing page and images in the article. Images must support the article and should be submitted as jpeg files.
